

CAPSTONE USER STORIES

Bandcamp clone

Sign Up

- As an unregistered and unauthorized user, I want to be able to sign up for the website via a sign-up form.
 - When I'm on the `/signup` page:
 - I would like to be able to enter my email, username, and preferred password on a clearly laid out form.
 - I would like the website to log me in upon successful completion of the sign-up form.
 - So that I can seamlessly access the site's functionality
 - When I enter invalid data on the sign-up form:
 - I would like the website to inform me of the validations I failed to pass, and repopulate the form with my valid entries (except my password).
 - So that I can try again without needing to refill forms I entered valid data into.

Log in

- As a registered and unauthorized user, I want to be able to log in to the website via a log-in form.
 - When I'm on the `/login` page:
 - I would like to be able to enter my email and password on a clearly laid out form.
 - I would like the website to log me in upon successful completion of the log-in form.
 - So that I can seamlessly access the site's functionality
 - When I enter invalid data on the log-in form:
 - I would like the website to inform me of the validations I failed to pass, and repopulate the form with my valid entries (except my password).
 - So that I can try again without needing to refill forms I entered valid data into.

Demo User

- As an unregistered and unauthorized user, I would like an easy to find and clear button on both the `/signup` and `/login` pages to allow me to visit the site as a guest without signing up or logging in.
 - When I'm on either the `/signup` or `/login` pages:
 - I can click on a Demo User button to log me in and allow me access as a normal user.

- So that I can test the site's features and functionality without needing to stop and enter credentials.

Log Out

- As a logged in user, I want to log out via an easy to find log out button on the navigation bar.
 - While on any page of the site:
 - I can log out of my account and be redirected to a page displaying recent FauxTweets.
 - So that I can easily log out to keep my information secure.

BandCamp

Create Musician

- As a logged in user, i want to be able to create a 'musician' that effectively serves as a storefront where products are albums and stores
 - Albums are the most prominent product
 - Nested within albums are individual songs which may also be added to the cart
 - Users cannot repurchase anything they have already purchased

Create Albums

- As a logged in user with a musician page i want to be able to create an album to sell
 - Albums are the most prominent product that can be added to cart
 - Nested within albums are individual songs which may also be added to the cart
 - Users who are not the Musician cannot repurchase anything they have already purchased, users cannot purchase their own music

Viewing Music

- As a logged in user, I want to be able to view a timeline of music that has been recently uploaded to the site
 - I can view music based on most recently update.
 - I can view music based on my own interests/genres

Updating Music

- As a logged in user with a musician storefront, I am able to update any of the album or song info that I own/created
 - Album info and songs can be updated
 - Songs can be updated and assigned to other albums user has made by drop down
 - Tracks can be uploaded
 - Track ids on songs are nullable to assist reordering, album ordering is by track num, then createdAt time

Add to Cart

- Music I like can be added to cart, either by album or by song
 - Cart displays a total, (Checkout is immediate? Like on Bandcamp)
 - Upon purchase music appears on my user details page for me to listen to
 - Users cannot repurchase anything they have already purchased
